

Company Name
CONTRACTS ENGINEERING LIMITED

Summary
<p>At Contracts Engineering, our focus and expertise is in manufacturing our clients' products and sub assemblies for them. This approach drives every aspect of what we do. We empower our team to work with our clients to solve their challenges and meet their manufacturing requirements. We are an ISO 9001:2015 accredited sheet metal work and metal fabrication manufacturer with processes and operations focused on on time in full delivery and quality assurance. We take extensive steps to ensure that our clients requirements are consistently met. Our service oriented business processes, advanced ERP and CAD systems and equipment enable us to perform all sheet metal and metal fabrication design, manufacturing and assembly in house. We operate from a 16,000 sq ft factory with modern, touch screen production planning software and a management team with decades of experience. We value problem solving, partnering with our clients, collaboration and working in a focused yet enjoyable atmosphere. We work to build partnerships and become a trusted and valued long term supplier to our clients. We can integrate seamlessly into existing supply chains or can help to build new ones, working with other suppliers in the UK and across the EU to meet our clients needs.</p>
